Subject: YMP comment

Part of Records Package / Supplement / Correction

Hi, sorry I'm too late to comment to the EIS, but after recently touring the site, and reading the media stories of late, I feel I must comment anyway.

Dear Decision-makers:

Please do not be dissuaded by the loud vocal minority who oppose the YMP. It makes good sense to use the Yucca Mt. area for storage. Transport is safe, storage is safe. The nation needs this project.

Nevada should take up support of this project in the interest of national security. The "Nevada is not a wasteland" people just don't understand the true impacts of this storage facility. It does not threaten Las Vegas or the surrounding area.

The governor and Las Vegas mayor are playing politics and jumping on the bandwagon to rally with the "wastelanders".

It makes good sense to pull Nevada out from the control of the gaming industry and those economic structures. The YMP has the potential to help diversify Nevada's economic base. Some people don't see that, or do and ignore it because the gaming industry pay for political campaigns.

Not all Nevadans feel the same about this project as the opposition you get at your public meetings. Please keep that in mind.
